Data & Product Analytics professional with 4+ years of experience defining KPIs, tracking product performance, and translating business needs into actionable insights. Proven ability to support data product lifecycles, from discovery to post-launch iteration cross cloud analytics platforms (Databricks), Agile delivery models, and cross-functional teams spanning business, engineering, and governance. Skilled at bridging stakeholders and data teams to drive measurable adoption, quality, and value realization.

CORE COMPETENCIES

KPI & Metrics Definition	Product Lifecycle Support	BI Dashboards & Reporting	Stakeholder Engagement
Data Quality & Governance	Value Realization Tracking	Agile / Scrum · Jira	SQL · Python · Power BI

PROFESSIONAL EXPERIENCE

Business Data Analyst - Product & AI Analytics · Mahantech Corp (Contract) Jul 2024 - Jul 2025
Remote, USA

- Defined and maintained 10+ KPI dashboards tracking product performance, SLA adherence, workflow bottlenecks, and usability metrics, surfaced adoption signals and escalated data quality gaps to Product Managers.
- Supported the full data product lifecycle from discovery and PRD authoring through sprint delivery, launch readiness, and post-release iteration, collaborating with Engineering and QA in Agile cycles.
- Modernized cloud-based ETL workflows on Databricks, improving data reliability by 95% and reducing compliance errors by 30%; validated metric definitions and monitored data consistency across products.
- Leveraged LLM-powered automation (Google LLMs) to reduce manual reporting effort by 40%; maintained baseline and post-launch measurements to quantify efficiency gains and value realization.
- Communicated data-backed insights, usage findings, and impact assessments to business stakeholders across a global, matrixed organization building trust through responsiveness and analytical clarity.

Data Analyst - Strategy & Forecasting (Intern) · British Airways Jan 2024 - May 2024
Dallas, TX, USA

- Built Power BI dashboards integrating multi-source operational data; tracked product usage trends and developed Python forecasting models improving demand planning accuracy by 10%.
- Authored complex SQL analyses on large datasets for revenue optimization and delivered what-if scenario models for strategic roadmap and prioritization discussions.

Graduate Assistant - Analytics · University of North Texas Dec 2022 - May 2024
Dallas, TX, USA

- Improved departmental reporting accuracy by 20% through performance analytics; conducted ANOVA and hypothesis testing to evaluate program effectiveness and inform leadership decisions.
- Trained 25+ faculty on analytics tools, accelerating data-driven decision-making and documenting learnings to support continuous improvement.

Data Analyst - Engineering & Analytics · Hashout Technologies Jan 2022 - Jul 2022
Bengaluru, India

- Translated business requirements into scalable analytical solutions with Product and Engineering teams, improving data processing efficiency by 25%; supported data pipeline development and frontend reporting features.

KEY PROJECTS

Patient Readmission TensorFlow · SHAP · Python	Predictive readmission risk model at 85% accuracy with SHAP explainability supporting clinical decision-making and proactive patient care planning.
Urban Walkability Neural Network · Python	City-level walkability analytics model using pattern recognition and predictive modeling to support data-backed urban planning decisions.
Smart Loan AI ML · Scikit-learn · Python	Credit risk and loan approval optimization models validated metric accuracy, assessed model reliability, and translated outputs into business-ready insights.

EDUCATION & CERTIFICATIONS

M.S. Business Analytics
University of North Texas, USA · 2022-2024

B.Tech Computer Science Engineering
Presidency University, India · 2018-2022

Certifications: Lean Six Sigma Green Belt (PMI) · Product Management (PMI) · Risk Management (UC Irvine) · Marketing Analytics (UVA) · Smartsheet Project Management Expert
